THE LOVE *Story*

When God writes your love story, even the stars fall into place.

Space bends, time pauses, and two hearts find each other exactly when they are meant to.

What began with a little movie date became a love we could never have imagined two souls discovering home in each other.

They thought they were simply going to watch a movie. Instead, they walked into the beginning of their favourite story.

And today, with grateful hearts, we celebrate the love God so perfectly placed in our lives.

One little movie date turned their lives cinematic.
